

## HKIUG 7<sup>th</sup> Annual Meeting – Cataloguing Session

### Problem list

**(Ranked in order of importance, 1 is most important, and 2 is next most important, and so on )**

1. Unable to view internal code
2. Search problem with CJK punctuations are fixed, however, problems are found in:
  - a. Search with ASCII punctuations and Chinese characters (*see p.6*)
  - b. Search with subtitle in Chinese records. A space is required to separate title proper and subtitle. (*see p. 7*)
3. Problem with global update function:
  - a. Processing large review file (e.g. 10,000 records) slows down system file transaction
  - b. Leader field (*see p. 19*)
  - c. Field 008 (*see p. 19*)
4. Problem with ISBN-13
  - a. Validation problem (*see p. 8-9*)
  - b. De-indexing problem (*see p. 10-13*)
5. Cursor jump problem

*Explanation: Insert a new line in a record by pressing Enter key, after typing the field tag number, the cursor jumps to the next line instead of the position of the 1st indicator of the new line. It is associated with Chinese character inputting. The problem will only show up and stay there for the rest of the session after inputting Chinese character(s) in a record. In other words, you won't have this problem until you input Chinese character(s) in a record.*
6. Pressing CTRL-H (verify headings) deletes a character at the cursor position

*Note: found only in Client JRE Version 1.5.0\_06*
7. In remote search result, display publication information in tag 260, instead of title information in tag 245 (*see p.3*)
8. Search index changes after remote databases are selected (*see p. 4-5*)
9. Problem with copying authority records (*see p. 14-18*)
10. Problem with Romanization (*see p. 19*)
11. Printing problem (*see p. 20*)

## **Enhancement list**

***(Ranked in order of importance, 1 is most important, and 2 is next most important, and so on )***

1. Enhancement in create list:
  - a. Search query can be copied to other application for editing
  - b. Free text box for putting search query
  - c. Select specific 880 tags for listing
  - d. Show information includes the range of the records being searched in addition to the search strategy currently supported
2. Offer more options for printing item records:
  - a. Print the full item
  - b. Print the item summary
  - c. Print no item at all
  - d. Print with MARC code meaning expanded or collapsed
3. Automatic validation of group tags. Incorrect group tag causes indexing error and searching failure. We wish the system can check the group tags automatically and display the incorrect one in red color and give a warning message when saving or closing a record
4. Highlight searched words in bibliographic record on the staff mode, the same as on WebPAC
5. Spell check
6. Information related to Cataloguing function (such as MARC load tables information) should be made available in the Cataloguing module
7. Provide “find” and “find again” functions on the editing screen
8. Preferred settings can be saved and maintained for future sessions so that users are not required to change the setting each time they log in:
  - a. Setting of "Retrieval View" and "Summary View" from the "View" -- "Record View Properties" menu option
  - b. Setting of “New records” from the “Admin” -- “Settings” menu option

Problem 7

In remote search result, display publication information in tag 260, instead of title information in tag 245

The screenshot shows the Millennium Cataloging software interface. The main window title is "Millennium Cataloging · [Z39.50 Broadcast Search] · Chinese University of HK · Library catal...". The menu bar includes "File Edit View Go Tools Admin Reports Help". The "Edit Functions" toolbar contains icons for "New", "Limit", "View", "Edit", "WB", "Browse", "Print", and "Close".

The "New BIBLIOGRAPHIC" section displays the following information:

TITLE Chuang zuo jing yan tan / Yu Dafu ... [et al.] zhu  
PUBL INFO Shanghai : Guang hua shu ju, [1933]

The search interface shows "Index: t TITLE" and "光華" in the search box. The "Expand All" button is circled in red. Below the search box is a table with columns "#", "TITLE", "ORIGIN", and "# ENTRIES".

At the bottom of the table, it says "NOT LIMITED" and "98 TITLE, 59 ENTRIES". The Windows taskbar at the bottom shows the "start" button, system tray icons, and the time "11:48".

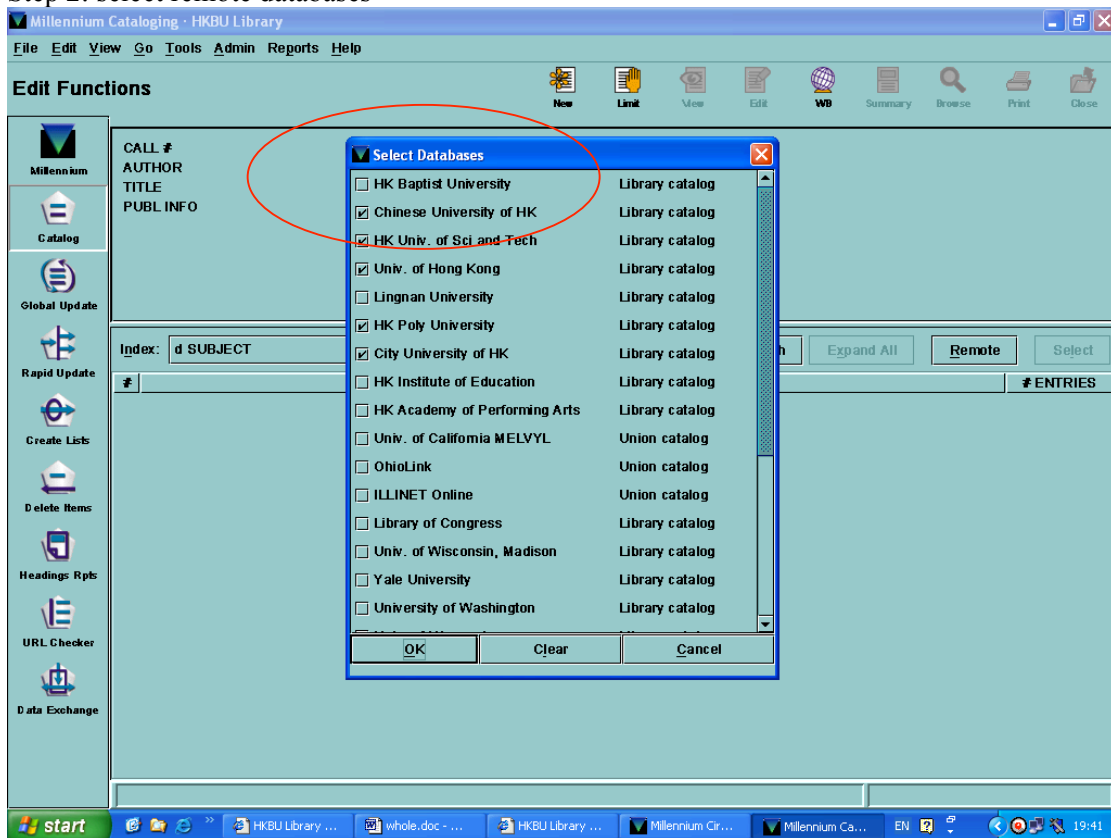

Problem 8

Search index changes after remote databases are selected

Step 1: select subject as index term

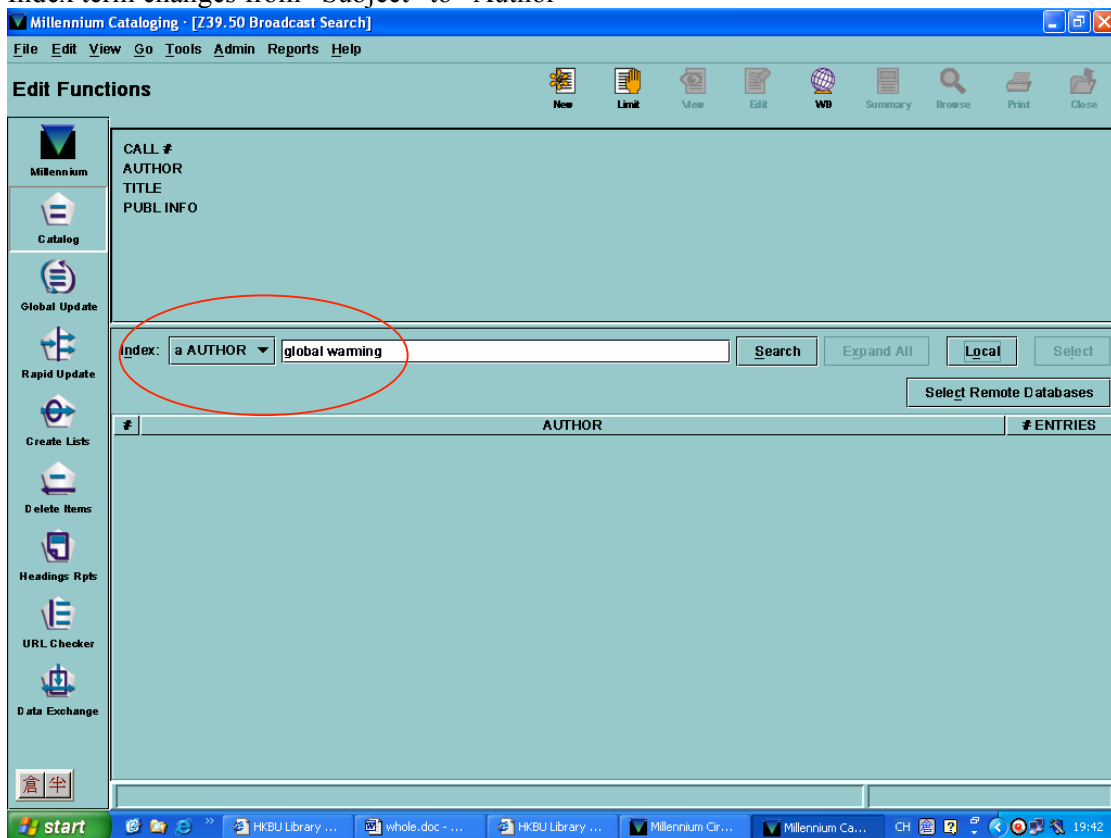

## Step 2: select remote databases

## Step 3

Index term changes from "Subject" to "Author"

The screenshot shows the Millennium Cataloging software interface. The title bar reads "Millennium Cataloging · The Chinese University of Hong Kong · Sum Lai Sheung · a18895700 · SUBJECT Authority (LCSH)". The menu bar includes File, Edit, View, Go, Tools, Admin, Reports, and Help. The toolbar contains icons for Insert, Save, View, Edit, Summary, Browse, Verify, Export, Print, and Close.

The main window displays the record ID "a18895700" with "Last Updated: 27-11-2006", "Created: 27-11-2006", and "Revisions: 0". Below this, there are fields for "ACODE1", "ACODE2", and "ASUPPRESS".

The MARC Leader is shown as "#####cz 22#####n 4500". The record contains the following fields:

Tag	Indicator 1	Indicator 2	Field Content
y	001		n 82031680a

The interface also includes a left sidebar with navigation options like Millennium, Catalog, Global Update, Rapid Update, Create Lists, Delete Records, Delete Items, Headings Rpts, Statistics, and URL Checker. The bottom status bar shows "a18895700" and "Edit Mode (INS)".

### Problem 3

#### b. Leader field

Changes made successfully on MilCat were not reflected also on character-based Innopac. For example, we changed the record type of leader field (i.e., leader 06) from “a” to “t” on MilCat. The record on MilCat reflected this change whereas the same record on character-based Innopac found no corresponding change.

Innovative replied that “this issue has been reported by multiple libraries and is being addressed in a central call. This call is linked to the central call and will remain open until a fix is available. Please check notes for this call on [csdirect.iii.com](http://csdirect.iii.com) for status updates.”

#### c. Field 008

Updating country code of two characters (e.g. cc) has to enter as cc<space>

### Problem 10

#### Romanization problem

- a) Fail to Romanize some Chinese characters, e.g. 埴, 駙, 壘 (checked Nov. 22, 2006)
- b) Romanize the following Chinese characters incorrectly:

字	正確拼音	錯誤拼音
卜	bu	bo (less used)
率綠绿閭驴履侶瀘慮	lü	lu
驢鋁褸氣	lü	lv
枳	shi	chi

Problem 11

Printing problem

In MilCat printing, data in one field is split in two lines.
